This symposium will take place at Smilow Cancer Hospital at Yale-New Haven, 51 Park Street, New Haven, CT.

Over the last several years, the scientific knowledge about endocrine tumor disease has exploded. The faculty of this symposium are experts in the pathogenesis, diagnosis, genetics, epidemiology, as well as medical and surgical management of tumors arising in the parathyroid, thyroid and adrenal glands.

Attendees of the course will learn about the latest scientific and medical developments in addition to state-of-art treatments.

This course will enable participants to:
- Analyze the latest clinical and molecular advances in endocrine tumor disease
- Identify appropriate work-up of patients with these disorders
- Assess when medical and surgical treatment is needed

Learning Objectives
- Assess when medical and surgical treatment is needed
- Identify appropriate work-up of patients with these disorders
- Assess when medical and surgical treatment is needed
- Assess when medical and surgical treatment is needed
