Registration Information

Online Registration Instructions:
1. Click "Find/Register for CME".
2. Go to "Live Courses".
3. Scroll down and select "The Appropriate Care of Patients with Vascular Disease".
4. Click "Register" to proceed.

Please note: You will be required to login or create a profile to register.

Returning users, please login or create an account online.

New Haven, Connecticut 06520-8052
"Primum non nocere"
Yale School of Medicine, Department of Surgery, Section of Vascular Surgery
Vascular disease affects more than a third of the adult population. Advances in minimally invasive endovascular therapy have exponentially increased the number of patients undergoing procedures for treatment of vascular disease. On the other hand, there has been a rise in interventions performed by physicians that are not typically trained in vascular medicine. A unique feature of this course will be a focus on the evaluation and treatment of vascular diseases. The symposium will emphasize the appropriate care of patients with vascular disease and highlight the advances in minimally invasive techniques and endovascular therapy. The symposium will include presentations on minimally invasive techniques and endovascular therapy in the field of vascular surgery.

6:00 – 7:00 am Registration and Continental Breakfast
7:50 am Welcome and Introductions
8:00 am The Evaluation of Lower Extremity Pain
8:10 am Appropriateness for PAD: Can we Agree?
8:20 am Venous Ablation for Venous Ulcers
8:30 am When and How to Screen for Vascular Disease?
9:00 am Drug Eluting Technology for PAD: More Questions, Less Answers
9:15 am The Evidence for and Against Atherectomy
9:30 am The Impact of Appropriateness Criteria on Coronary Interventions
9:40 am Debate I: Endovascular Therapy or Surgical Therapy?
10:00 am Are Endovascular Procedures Safe?
10:10 am NOON
10:30 am Aortic Aneurysm with Subclinical Conduct: Is it Worth it?
10:40 am The Significance and Impact of Atrial Fibrillation in PAD
11:00 am Debate II: Exercise Therapy for Claudication is Torture Everyone Should Avoid
11:15 am The Overuse of Venous Procedures
11:20 am The Impact of Appropriateness Criteria on Coronary Interventions
11:30 am The Significance and Impact of Atrial Fibrillation in PAD
11:40 am Aortic Aneurysm with Subclinical Conduct: Is it Worth it?
11:50 am Debate III: Is Endovascular Surgery for AAA Warranted
12:00 pm NOON
12:15 pm Debate III: Is Endovascular Surgery for AAA Warranted
12:30 pm Metropolitan Wound Care Society Meeting
12:45 pm Current Trends in Venous Thromboembolism and Their Reversal
12:50 pm Adjourn

Learning Objectives
- Identify patients with vascular disease who benefit from screening
- Introduce new medical therapies that benefit patients with PAD
- Review risks and benefits of different modalities for lower extremity revascularization
- Reinforce appropriate care in using PAD and when revascularization is warranted
- Provide an overview of treatment modalities for vascular disease
- Reinforce appropriate care in vascular disease
- Summarize the recent guidelines for AAA management
- Discuss the different endografts and techniques to treat AAA
- Summarize the advantages and disadvantages of new oral anticoagulants and their recent agents
- Update on different modalities for clot removal for treatment of venous thromboembolism
- Discuss the different modalities for treatment of carotid disease
- Introduce endovascular therapy for treatment of stroke
